

Model SWMC

Through The Wall Evaporative Cooler

MasterCool's SlimWall™ cooler is the perfect choice for cooling areas where it may not be practical to install air conditioning ... like garages, workshops and Arizona rooms. And it complies with most Homeowners Association codes, covenants and restrictions because it can be installed below the fence line, close to the wall, and practically out of sight. Imagine using the workshop in your garage all summer, or enjoying a "pre-cooled" car!

The flexibility of the Slim Wall™ cooler also makes it the perfect choice for those areas in your home that need economical cooling when your more expensive air conditioning just isn't needed. MasterCool's Slim Wall™ cooler is an effective solution, from room additions – to second story "hot spots" – to offices and dens – to zone cooling just the bedroom.

MasterCool®

SLIM WALL™

A Cooler So Slim You'll Forget It's There!
